

2020 Results

In collaboration with its Haitian partners, The KANPE Foundation supports families and their communities as they work to achieve autonomy by strengthening six essential pillars: health and nutrition, food security and climate resilience, education, entrepreneurship, leadership, and improvement of local infrastructure.

In keeping with our mission, here are our 2019 onsite result-driven achievements*:

HEALTH AND NUTRITION

Local Haitian Partner: Zanmi Lasante

Care and prevention services offered to 17,000 residents (Baille Tourible and surrounding communities). Available data for 2020 show that the clinic** offered daily care through its various services:

- Consultations* (monthly average of 864).
- Laboratory tests (monthly average of 304).
- Free distribution of medication.
- Treatment of moderate and severe malnutrition (monthly average of 18 children).
- No new cases of cholera since January 2018.
- Prenatal consultations (monthly average of 148 families) and childbirth (41).
- Family planning services (monthly average of 800 people).
- Sexuality training offered to the adult population and adolescents in the areas of reproductive health, personal hygiene, environmental health, pediatrics, and STD/HIV prevention.

- Transportation service for patients, medical team members, and medications.
- Hiring of 6 new staff members. 29 jobs maintained at the clinic, including: general practitioner, nursing assistants, pharmacy assistants, social worker, primary care nurses, medical technologists, and a pharmacist.
- **Actions related to the COVID-19 pandemic:**
 - Training and implementation of new safety protocols for the prevention of COVID-19 infection.
 - Installation of 4 water stations at the clinic and at the public school for hand washing to prevent infection by COVID-19.
 - Training and deployment of a dozen young people in the population to inform about COVID-19 and raise awareness about its prevention methods - 1902 families reached and visited 2 times each.
 - Distribution of prevention and protection materials against COVID-19 to our beneficiaries including :
 - 2,000 washable masks;
 - 3,814 sanitary kits including soap and chlorine for water;
 - Information and awareness posters installed at key points in the territory;
 - Purchase and commissioning of an ambulance vehicle to transport the very sick to a larger health facility.

* The COVID-19 pandemic and the various measures taken to reduce its spread forced us to slow down or even stop certain activities for a few months in the community we support.

** A drop in clinic attendance occurred during the first months of the pandemic between April and June (due to fear of stigmatization).

2020 Results

FOOD SECURITY AND CLIMATE RESILIENCE

Local Haitian partner: Mouvement Paysan Papaye

- Startup of the experimental farm, production of more than 20,000 seedlings (11,201 fruit trees and 9,584 forest trees), and distribution of 11,530 seedlings to our beneficiaries.
- Training for the members of seven local beneficiary associations on seedling production techniques and their maintenance, the establishment of flower beds and the production of natural insecticides.
- Production of 2 annual harvests of beans (lower than usual volume produced due to drought this year).
- Teaching agricultural concepts in high school and practical sessions related to agriculture and animal husbandry.
- Participation of the 84 youth of the marching band in plastic waste collection activities.
- **Actions related to the COVID-19 pandemic:**
 - Launch of three collective nurseries and 500 subsistence gardens producing 56,000 vegetable seedlings for the benefit of the most vulnerable families in the community.
 - Distribution of food rations to 450 public school students during the lockdown period in Haiti due to the COVID-19 pandemic.

EDUCATION

Haitian Partner: Summits Education

- Support to the management of the public elementary school, allowing :
 - the preparation and distribution of hot meals to 450 students;
 - continuous training of teachers;
 - maintenance of the building.

- Distribution of medication against intestinal worms to 450 students.
- Recovery of 3,241 books already in use and redistribution to students for the 2020 school year.
- **Actions related to the COVID-19 pandemic:**
 - Information sessions on the pandemic and its prevention methods.
 - Distribution of 57 radios and 464 books for conducting distance learning reading programs during the lockdown in Haiti.

LEADERSHIP & ENTREPRENEURSHIP

- Steps for the official registration of the Association des Jeunes Leaders de Baille Tourible (AJLBT) composed of the doctor in charge of the clinic, an agronomist, 2 nursing assistants, pharmacist's assistant, and 3 teachers.
- Ongoing support to the ODB Farmers' Association.
- Training in basic accounting for 15 representatives of the 3 women's associations of Baille Tourible.
- Cleaning and beautification of the clinic by the women's associations.
- Logistical and financial support for the organization of cultural and sports activities in the context of International Women's Day.
- **Actions related to the COVID-19 pandemic:**
 - Training of 50 leaders in charge of accompanying the beneficiaries of our vegetable garden program.
 - Resumption of the marching band's activities in September following the application of a rigorous health protocol.

STRENGTHENING LOCAL INFRASTRUCTURE

- Fencing and preparation of the ground for the start of the experimental farm.
- Renovation work at the public school (450 students): repair of beams, replacement of sheeting.
- Steel sheeting replacement and installation of a separation wall (between the 5th and 6th grade classes), repair of 45 benches, manufacture of 21 new benches, 6 cabinets, and 6 teacher's chairs.
- Repair of the oven in the school canteen kitchen.
- **Actions related to the COVID-19 pandemic:**
 - Construction of a new triage space at the clinic to facilitate the physical distancing of patients.
