Overall Results
2011-2019

In collaboration with its Haitian partners, The KANPE Foundation supports families and their communities as they work to achieve autonomy by strengthening six essential pillars: health and nutrition, agriculture, education, entrepreneurship, leadership, and improvement of local infrastructure.

Following our mission, here are our 2019 on-site result-driven achievements:

**HEALTH AND NUTRITION**
Local Haitian partner: Zanmi Lasante/Partners In Health

- Care and prevention services offered to over 11,000 residents of Baille Tourible (people from neighbouring communities almost double that number), including:
  - Consultations (annual avg. of 6,730).
  - Free distribution of medication.
  - Lab tests (monthly avg. of 320).
  - Malaria tests (no malaria cases since 2015).
  - Cholera treatment (treatment of more than 1,700 cases between 2011 et 2017, no new cases since January 2018).
  - Treatment of severe or moderate malnutrition (annual avg. of 170 children).
  - Distribution of a basic water purification system to 550 families.
  - Family planning services (annual avg. of 800 people) and prenatal consultations (monthly avg. of 120 families).
  - Training in health education in the areas of reproductive health, personal hygiene, environmental health, childcare, and STD/STI/HIV prevention offered to the general population and young people.
  - Transportation services for patients, members of the medical team, and medications.
  - Jobs created and maintained at the clinic including: general practitioner, nursing assistants, assistant pharmacists, assistant social worker, primary care nurses, medical technologists.

**AGRICULTURE**
Local Haitian partner: Mouvement Paysan Papaye

- Acquisition of the land for the construction of an experimental farm.
- Distribution of bean seeds to 250 farmers and 72 young people from the marching band leading to 2 annual bean harvests (since 2016).
- Distribution of nearly 3,300 farm animals, training and implementation of a goat breeding project by the farmers' association (ODB).
- Reforestation campaign, including: the production and planting of 18,000 seedlings since 2017 (12,000 fruit and forest seedlings by the local peasant association and 6,000 additional seedlings by young people from secondary school and the marching band).
- Active participation of 84 young people from the marching band in reforestation days (including a climate march retweeted by activist Greta Thunberg) and implementation of monthly waste collection activities.
- Training in soil and water conservation techniques for approximately 250 farmers.
- Training in agriculture to more than 120 young people at the summer camp since 2016.
- Integration of activities related to agriculture and livestock into the secondary school curriculum since 2016.
